## COOLmob's Greening the Darwin Festival project

---

COOLmob is excited to announce a new project: Greening the Darwin Festival!  
Funded by the City of Darwin COOLmob will be developing an emissions  
baseline for the Darwin Festival -Thanks City of Darwin!

Over the coming week COOLmob's newest energy expert and Carbon  
Accountant Nisitha will be developing our methodology and project plan.  
Welcome Nisitha.

The Environment Centre were also a happy grant recipient being awarded a  
small grant to develop our Top End Wildlife Guide.

## Smart Cooling- Helping you stay cool!

### Smart Cooling in the Tropics Project Report

With 340 eligible households signed up and over half of these the happy recipients of their complimentary treatment COOLmob's Smart Cooling in the Tropics project is helping hundreds of Territorians reduce their energy use and stay cool.

Here are just some highlights:

- 300 energy monitors deployed
- 46 fan packages delivered
- 25 screens repaired or replaced
- 36 air conditioners cleaned and serviced
- 15 roofs painted with reflective roof paint
- 17 ceiling fans repaired or replaced
- 6 workshops delivered.

If you struggled through this last wet season with your electricity bills we strongly encourage all eligible households to contact us to check their eligibility now before time runs out on this unique fully funded opportunity. Contact the COOLmob team today **(08) 8981 3642** or visit the [website](#).

## WIN a trip for two!

### Are you a Smart Cooling household?

All households that have already received a home energy assessment and who complete our post-assessment survey by **July 31st 2015** go into the draw to **WIN a one day tour** of Litchfield National Park for two people with Ethical Adventures.

This prize is valued at \$334 but free to one lucky existing Smart Cooling household!

Our survey won't take long and will ensure we are providing the information you need **now** to stay cool and cut your energy bills this coming wet season. **Complete your survey online at:** [www.surveymonkey.com/r/SmartCooling](http://www.surveymonkey.com/r/SmartCooling) (or) simply by calling the team at COOLmob on: **(08) 8981 3642.**

## Smart Cooling in the Tropics participant Case Study:

Late last year Smart Cooling in the Tropics were invited to Maxine's home to deliver her **free home energy assessment**. Based on the assessment, Maxine and her assessor agreed that the **screen replacement package** on offer would have the best impact on her household's thermal comfort and energy consumption.

Having new fly screens and locks means Maxine can now safely leave her doors and windows open to let in cooling breezes and no longer relies on air conditioning to keep cool.
