

## Cut your homes energy bills

Cutting your energy consumption and associated energy bills is easy once you know how. Here are three COOL ways you can cut your energy bills.

### 1. DIY home energy audit

Get started by knowing your homes energy profile. Borrow one of COOLmob's new ipads to do your own walk through energy assessment or follow the [link](#).

### 2. For a fee - COOLmob can come and do this for you!

We'll analysis your billing history, conduct a home visit and provide with a report all for \$300 (excluding billing access fee from Power and Water). We can tell you exactly what measures will impact your energy consumption and reduce your bills.

### 3. Switch it off or turn it up

The fastest and easiest ways to cut your energy use is to turn your air conditioner off or turn up the temperature to 27 degrees –each degree
