

WHAT IS SMART COOLING IN THE TROPICS?

Smart Cooling is a great free new project working with low-income households to help find ways to reduce electricity usage and stay cool.

If you are eligible for the project, Smart Cooling will come to your home and provide a free home electricity assessment. We will work with you to show you:

- how to understand your jacana energy bill
- which appliances are using the most electricity
- how to save electricity and money through simple changes to your home.

You will receive;

As part of this free service, depending on your particular needs, Smart Cooling may provide a range of free services including:

- Cleaning of your cooling appliances
- In home displays and monitors to better manage your cooling appliances
- Free community workshops
- Structural modification to your home where necessary

Why is it free?

The Smart Cooling project is funded by the Federal Government's Low Income Energy Efficiency Program (LIEEP).

The information and lessons learnt from the project will be used to improve energy efficiency policies - to help all Australians live comfortably while playing their part in protecting and preserving the environment.

Am I eligible?

To be eligible you need to be a resident of Darwin, in private rental accommodation or your own home (not in Territory Housing) and you will need to have one of the following:

- a low income health care card
- receive an approved Centrelink payment
